## TECH STACK

**Front-end**
JavaScript
React JS (Hooks, Redux)
CSS3, HTML5
Bootstrap, React Bootstrap

**Back-end**
Node.js (Express)
PostgreSQL

**Other Technologies**
Git, GitHub, VS Code
Postman, Heroku, Netlify

**Workflow**
Agile, Miro, Trello
Metro Retro

## TRANSFERABLE SKILLS

Worked as a finance intern which enabled me to develop a range of transferable skills including:

- Numeric and quantitative skills
- Problem-solving and analytical ability
- Commercial awareness

## PROFILE

Analytical minded Full Stack Web Developer, Investment and Risk Finance MSc, currently seeking a front-end developer role to further develop and apply a highly transferable skill set accumulated through professional and academic experience. Confident in the ability to deliver significant and measurable value to any organisation.

## PROJECT EXPERIENCE

Code Your Future | **Feedback Tracker** | 11/2020

A tool to enable mentors to give feedback to students on their technical skills and to keep track of student's progress.

- Worked in a team of four developers and two product owners to deliver a full stack application from concept to MPV in 4 weeks.
- Built controlled form components in React and implemented React Router to create protected views.
- Connected the front and the back end of the application using Axios library and performed HTTP requests to create, read, update, and delete users' details in the database.
- Worked closely with the team in building the Express server, API endpoints, React components as well as designing the Postgres database schema.

   https://feedback-compass.herokuapp.com/

Udacity | **Polls** | 07/2020

A dynamic multiple choice questions application where users can create their own set of questions, choose between answers, and keep track of question popularity.

- Created React components to design the user interface and used Redux to manage state changes in a more predictable way.
- Implemented React's useContext hook to reduce prop drilling.
- Applied React Router to navigate between the different application views.

## EDUCATION

**Code Your Future,** *Full Stack Web Developer Course* | 02-10/2020

An intense 9-month web development course taught by professionals working in the industry.

- Learned to build mobile-first web applications with JavaScript ES6, HTML, CSS and React on the front-end and, Node.js (Express) and PostgreSQL on the back-end.

- Gained practical experience of working in projects in Agile teams with sprints, retrospective, and daily stand-ups.

**Udacity,** *React Nanodegree* | 04-08/2020

A 4-month program with a focus on building declarative user interfaces with React and on managing the state more predictably with Redux.

- Learned to manage complex state to build enterprise-level apps.

**University of Westminster,** *MSc Investment and Risk Finance*
09/2014 – 09/2015 | London, UK
- Graduated with Distinction.

**University of Westminster**, *BA Business Management with Finance and Financial Services*
09/2011 – 07/ 2014 | London, UK
- Graduated with 2:1 Honours.

## WORK EXPERIENCE

**Trusted Group Holdings**, 01/2020 - current | Manchester, UK

*Office Administrator*

- Use strong prioritisation, organisation, and time management skills to ensure an efficient flow of office procedures.

**BookingGo,** 01/2017 - 01/2020| Manchester, UK

*Sales Advisor*

- Received calls from customers worldwide enquiring about car hire, used efficient rapport building and questioning skills to establish needs and problem-solving skills to find the best solution for the customer.

**Electrocasa, Ltd,** 01/2016 – 11/2016 | Praia, Cape Verde

*Finance intern*

- Used numeracy and analytical skills to assist with account reviews, month-end financial reports and forecasting. Dealt with accounts receivables, payables, and bank statements reconciliation.
